PROJECTS

SHUSHASTHO   [GitHub](#)

Healthcare System : designed to simplify and enhance medical services. Schedule appointments, manage users, and access a real-time Blood Inventory for critical needs. Our platform connects you with trusted doctors, blood banks and offers instant assistance via an AI-powered Chatbot.

Technology used : React js, Node js, Express js, Tailwind CSS, daisyUI, MongoDB, Python

STAYVISTA   [GitHub](#)   [Live link](#)

Hotel Booking System developed a user-friendly platform for seamless hotel reservations, featuring intuitive customer search, real-time room availability updates, secure payment integration, and automated notifications. Includes an admin panel for managing inventory, pricing, and reservations efficiently.

Technology used : React js, Node js, Express js, TanStack, JWT, Tailwind CSS, Meraki UI, Firebase, MongoDB

Freelancer   [GitHub](#)   [Live link](#)

A Freelancer Platform Web Project connects freelancers and clients through user-friendly profiles, allowing freelancers to showcase skills and clients to post job requirements. The platform supports job posting, bidding, advanced search filters, secure payments, and reviews for trust-building. An admin panel enables efficient management of users, transactions, and policies.

Technology used : React js, Node js, Express js, TanStack, JWT, Tailwind CSS, daisyUI, Firebase, MongoDB

E-Commerce-Cart   [GitHub](#)

The project offers an easy shopping experience. Users can log in, search for products, add them to their cart, change quantities, or remove items. They can also view past carts and get a congratulatory message at checkout, making shopping simple and enjoyable.

Technology used : React js, Node js, Express js, Tailwind CSS, MySQL.
